EDUCATION

B.E. Computer Science & Engineering

BMS Institute of Technology &

Management

2025 – 2029

SKILLS

Frontend

HTML5 • CSS3 • Responsive Design

Programming

Python (Basics) • C (Basics)

Database

Supabase • MongoDB • Firebase

Design

Canva • Figma • Photoshop
UI/UX • Branding • Social Media
Poster & Logo Design

Other

Vibe Coding / AI-Assisted Dev
Rapid Prototyping • Creative Thinking

STRENGTHS

Creative Problem Solving • Visual
Storytelling • Fast Learner • Adaptability •
Team Collaboration

INTERESTS

UI/UX Design • Frontend Dev • Graphic De-
sign • AI • Creative Innovation

SUMMARY

Design-driven frontend developer blending UI/UX craft with hands-on web development — building responsive interfaces in HTML/CSS, connecting them to modern backends like Supabase, MongoDB, and Firebase, and using AI-assisted “vibe coding” to prototype ideas fast. Combines a graphic designer’s eye for color, composition, and branding with a builder’s grasp of Python, C, and frontend–database integration. Thrives at the intersection of visual storytelling and functional product design, turning rough concepts into polished, usable interfaces.

EXPERIENCE

Design Associate, Core Team — Coding Club, BMSIT&M Mar 2026 – Present

- Designed **10+ posters**, branding assets, and social media creatives for technical events
- Created visual identity concepts for club events, unifying tone across all campaign materials
- Designed apparel and credentials — varsity jackets, jerseys, T-shirts, and ID cards — for club members
- Applied visual storytelling, color theory, and layout principles for cohesive branding across platforms

Editorial Director — Rotaract Club of BMS Yelahanka Jun 2026 – Present

- Managing social media pages and posts, planning content to grow visibility and engagement

PROJECTS

Echonex — Smart Voice-Controlled Home Automation Platform

- Owned frontend/UI design and led project presentation for a voice-controlled automation concept
- Explored ESP32 integration, automation logic, and real-time monitoring workflows

AI-Based Study Planner

- Designed the UI and end-to-end workflow for an AI-powered study planning platform

SparkHabit — Daily Creative-Habit App

- Vibe-coded a Next.js app delivering 10 – 15 min daily creative challenges to sustain artistic, musical, and writing habits
- Implemented user authentication and data storage with Supabase, and a component UI system with shadcn/ui

ACHIEVEMENTS

- Recognized within the Coding Club for creativity and visual aesthetics in design output
- Contributed branding across multiple student initiatives and campus events
- Strong applied understanding of color balance and visual composition
